Pioneers of Yilgarn

Stage 1.

Citizens who built this district between years 1887 and 1914

Colman, Sam: Came to Southern Cross in 1894 to manage a coaching and camel business. He filled the position of Mining Registrar for two years, then opened a billiard room and fancy goods shop in 1898.

Colman was civic minded and the push behind building the Masonic Temple for which he laid the foundation stone in 1898. The building and its foundation stone still stand. The billiard room and fancy goods business has passed through several owners, the present owners being Peter & Nicole Carlson.

COVID Vaccination - Booster doses

All adults can get a booster if it's been 6 months or longer since their last COVID-19 booster or confirmed infection (whichever is most recent) for additional protection against severe illness from COVID.

This is particularly recommended for people at higher risk of severe illness, including:

- everyone 65 years and over
- everyone 18 years and over with medical comorbidities, disability or complex health needs.

Children and adolescents aged 5 to 17 with health conditions that put them at risk of severe illness can also get a booster dose if it's been 6 months since their last dose or COVID-19 infection, based on an individual risk assessment with their immunisation provider.

Booster doses are not recommended at this time for children and adolescents aged 18 years or under who do not have any risk factors for severe COVID-19.

All vaccines are approved for use in Australia and continue to provide very strong protection against serious illness from COVID-19, however, Omicron-specific bivalent vaccines are preferred for boosters.

Southern Cross General Practice are offering Pfizer Bivalent (BA.4-5) 12 years+ vaccinations from 14th March 2023. This vaccine provides protection from the original strain of SARS CoV-2 and from Omicron variants BA.4 and BA.5. Vaccine stock is limited at this stage so please call 90491147 to book an appt or to discuss eligibility.

The date you had your last COVID-19 vaccine is on your COVID-19 digital certificate.

I was fortunate enough to start my working career in Kalgoorlie and from then on I always knew I would come back to live.

Now I am here to set up to provide hearing care to Kalgoorlie, Norseman, Leonora, Esperance, Kambalda and Southern Cross. I believe this will enhance the lives of generations of locals, helping them to hear, allowing them to engage so they can be heard and helping to maintain the connection that hearing brings with friends and loved ones.

How mobile networks work

Mobile networks send and receive low powered radio signals, otherwise known as radiofrequency electromagnetic energy (RF EME).

The devices send and receive signals from mobile base stations.

They come in all shapes and sizes:

Macro Cells

Cover large geographic areas.

Small Cells

Deployed with minimal visual impact. Co-located on existing public infrastructure, such as electricity and light poles.

In Building Cells

Strategically placed inside buildings.

Mobile network operators use different infrastructure solutions to achieve maximum, optimal coverage for customers.

You can be assured that the technology and infrastructure providing your mobile service is researched, regulated and safe.
